Project Title: Motorcycle – Boxer 150cc

Project Abstract:

Our Agricultural Extension program is far reaching into many villages. Nearly all of these villages are beyond walking distance for our two trainers. Kilimo Timilifu (KT) would like to purchase of a 150cc motorcycle to alleviate the travel expenses of hiring drives and motorcycles to transport our trainers.

Total cost is \$3,200 USD for a 150cc Motorcycle.

Project Description:

In 2017 we started our Extension program which includes traveling in to the surrounding villages to do agricultural training seminars with the local farmers. Normally two trainers are going each time. Not having our own suitable form of transportation requires KT to hire local drivers and public transit motorcycles to take our trainers from village to village. However, we have found that this cost is quickly adding up. Our expense records show that at our current expense rate for this means of transportation, we would recover our costs in purchasing our own motorcycle, training and licensing for our driver, registration fees, and transporting the motorcycle to our location all within about three years. This would significantly reduce our travel expenses and save our limited resources considerably.

Project Goals & Objectives:

- Raise \$3,200 USD Total.
- Train a KT designated driver and assist him/her to acquire an official driver's license.
- Purchase a Boxer 150cc Motorcycle.
- Register the motorcycle in KT's name.
- Transport the motorcycle to KT's location.
